

30-Hour Clinical Supervision Training

GEORGE FOX UNIVERSITY

August 1-2, 2024 and August 22-23, 2024

Virtual Synchronous from 9:30AM-2:30 PM (The remaining hours will be asynchronous)

The training is designed to introduce independent mental health practitioners to the specialty of clinical supervision and facilitate an initial mastery of basic supervision competencies. Special focus is on supervising professional counselor and marriage & family therapist interns for licensure.

The workshop fulfills the 30-hour educational requirement of the Oregon Board of Licensed Professional Counselors and Marriage & Family Therapists (OBLPCT).

OVERVIEW

The course is taught in a blended format, including a combination of both synchronous and asynchronous activities. Participants will be required to complete readings and other assignments in preparation for virtual meetings and online class activities. Participants will explore advances in clinical supervision, including models, approaches, techniques, relationship and process issues, and legal and ethical considerations. Teaching methods include collaborative didactic instruction, including review and discussion of reading materials, and online class activities as well as experiential instruction including group supervision of supervision via video tape, audio tape, or case presentation.

30-Hour Clinical Supervision Training

GEORGE FOX UNIVERSITY

This workshop may fulfill graduate university supervision training requirements for site supervision of professional counseling and marriage & family student interns. The series is also intended to assist licensed mental health professionals who do not have an LMFT to become approved systems supervisors for MFT student interns.

The course may also be used toward the six-hour training requirement for clinical social workers. Likewise, the course is intended for clinical psychologists interested in supervision training. The workshop may comply with the educational standards in supervision required by other accrediting agencies and state licensing boards; it is the responsibility of the participant to obtain verification directly with those organizations.

REGISTRANT QUALIFICATIONS

- Only therapists/counselors who have completed a master's degree or higher in a nationally recognized independent practitioner mental health profession are eligible to register for this workshop. This includes professional counselors, marriage & family therapists, clinical psychologists, and clinical social workers.
- This course is best suited for licensed clinicians. While the OBLPCT strongly recommends that all clinicians complete one year of postgraduate supervision prior to beginning training as a supervisor, this workshop will meet the Board's educational requirements for all post-master therapists/counselors regardless of license status.

30-Hour Clinical Supervision Training

GEORGE FOX UNIVERSITY
